## Picture It In Your Home

—this Wonderful Warm-Air Furnace that Looks Like a Phonograph

This picture shows the installation of an Estate Heatrola in a modern six-room home.

Picture one in your home.

See what a wonderful improvement it is over a heating stove. Note how beautifully it blends with other home furnishings. It combines the efficiency of a furnace with the appearance of a phonograph.

Estate Heatrola is a furnace—not a stove. Placed in one of the living rooms, it heats 3 to 6 connecting rooms, in even the coldest weather.

Burns any kind of coal, and uses less coal than a stove.

Beautifully finished in grained mahogany—a vitreous enamel, practically everlasting. You can rub and dust it with a cloth, just as you do your furniture.
